ABOUT ME

Full-Stack Developer with 2 years of experience building scalable web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Skilled in developing responsive UI, secure REST APIs, and integrating enterprise services including Oracle Integration Cloud (OIC). Experienced in delivering end-to-end solutions in agile environments while writing clean, maintainable, and efficient code. Passionate about solving complex problems and building high-performance applications that create real business value.

EDUCATION

2021 - 2023	Master of Computer Application Kongu Engineering College, Erode CGPA of 7.7
2018 - 2021	B.Sc (Computer Science) Kongu Arts and Science College, Erode CGPA of 7.2
2017 - 2018	Major Of Maths & Computer Science PSG Matriculation School, Sankari 70 Percentage

SKILLS

- | | | | |
|----------|-------------|--------------|-----------|
| • HTML | • CSS | • JavaScript | • ReactJS |
| • NodeJS | • ExpressJS | • MongoDB | • MySQL |
| • OIC | • VBCS | • NextJS | • Python |

EXPERIENCE

2024 - Present

NearTekPod APAC Technologies | Associate Software Engineer

- Developed and maintained scalable full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js), delivering responsive and high-performance user experiences.
- Designed and implemented RESTful APIs and backend services, ensuring secure data communication and seamless integration with enterprise systems.
- Integrated applications with Oracle Integration Cloud (OIC) and external APIs to enable reliable data exchange and streamline business workflows.
- Collaborated in Agile development environments to design, develop, test, and deploy features while maintaining clean, maintainable, and optimized code.

PROJECTS

InterContinental Hotels Group (IHG), USA

Role: OIC Developer

Duration: 8 months

- Developed end-to-end OIC integrations using REST, SOAP, FTP, OHIP, and OCI Streaming to connect booking engines, loyalty programs, and Opera Cloud.
- Implemented secure API connections using OAuth 2.0, with strong error handling, logging, and monitoring for high system reliability.
- Built a VBCS application to manage membership deposit points in Opera Cloud, improving operational efficiency.
- Utilized OCI services including ATP and Streaming Service for processing reservation and guest data with high performance and accuracy.
- Supported legacy-to-cloud migration ensuring real-time data synchronization and seamless hospitality operations.

SimplifyAI

Role: MERN Stack Developer

Duration: 3 months

- Architected and developed a scalable SimplifyAI using the MERN Stack, designed as 3 integrated microservices applications to support centralized Data Warehouse reporting for 200+ employees.
 - Implemented secure authentication using cookies and protected routing, ensuring 100% controlled access and session handling across 3 distinct user roles.
 - Developed and rigorously validated 15+ RESTful APIs with Express.js and Postman, ensuring smooth data exchange and reliable service-to-service communication.
 - Optimized MongoDB schemas and integrations with the Data Warehouse to enhance data retrieval performance and system efficiency.
 - Designed a responsive and intuitive User Interface using React.js, improving user experience and accessibility across devices.
-

SmartKonnnect

Role: Full Stack / Integration Developer
Duration: 6 months

- Designed and developed SmartKonnnect, a middleware solution connecting any PMS with Opera (OHIP APIs) for real-time hotel data synchronization using Vue.js, Node.js, and Express.js
- Implemented Producer-Consumer streaming architecture for asynchronous data exchange between PMS and Opera, leveraging Streaming Services, OXI, and custom npm packages.
- Integrated REST and GraphQL APIs to manage diverse data types including reservations, profiles, and availability, ensuring high performance and reliability.
- Implemented secure authentication, optimized MySQL data structures, and improved end-to-end flow for faster processing and seamless cross-system communication

AirekruitPro

Role: Full Stack Developer
Duration: 3 months

- Developed AirekruitPro using Next.js with optimized routing, Context API, Redux, and asynchronous event looping to support end-to-end recruitment workflows.
- Integrated an AI-agent (GPT-3.5) to parse single/bulk resumes, analyze job descriptions, generate candidate insights, and produce AI-based scoring.
- Built secure REST APIs for job posting, resume uploads, AI processing, and automated interview lifecycle management.
- Implemented CI/CD pipelines using GitHub Actions for automated builds, testing, deployments, and continuous integration.
- Automated interview scheduling and built an AI-driven interview engine that asks dynamic questions, converts audio responses to text, and uses the AI-agent to generate final scores for next-round decisions.

ACHIEVEMENTS

2024 - 2025	Certified Application Integration Professional – Oracle Cloud Infrastructure (2024) Demonstrated expertise in designing and implementing cloud-based integration solutions and workflows using Oracle Integration Cloud (OIC).
2023 - 2024	Oracle Certified Foundations Associate Successfully completed certification validating foundational knowledge in Oracle technologies and cloud concepts. Learning Pioneer Award – NearTekPod Recognized for outstanding commitment to continuous learning and upskilling in emerging technologies and platforms.

DECLARATION

I hereby declare that the information furnished above is true and correct to the best of my knowledge and belief
